

## - Install APF Firewall

Login dengan root

```
# cd /root/
```

```
# wget http://www.rfxnetworks.com/downloads/apf-current.tar.gz
```

```
#tar -xvzf apf-current.tar.gz
```

```
#rm -f apf-current.tar.gz
```

```
#cd apf-0.9.4-6
```

```
#sh ./install.sh
```

atur sesuai kebutuhan

```
#cd /etc/apf
```

```
#pico -w conf.apf
```

restart service

```
#!/usr/local/sbin/apf -s
```

## - Install BFD

login sebagai root.

```
#cd /root/
```

```
#wget http://www.rfxnetworks.com/downloads/bfd-current.tar.gz
```

```
#tar -xvzf bfd-current.tar.gz
```

```
#cd bfd-0.4
```

```
#./install.sh
```

edit file konfigurasi, enable deteksi dan rubah alamat pengiriman laporan.

```
#nano /usr/local/bfd/conf.bfd
```

kemudian restart servicenya
