

1) Download installer

<http://www.zvps.co.uk/sites/default/files/downloads/zpanelx-centos-6-beta.tar.gz>

2) ekstrak

```
tar -xf zpanelx-centos-6-beta.tar.gz
```

3) rubah hak aksesnya

```
chmod +x installer.sh.x
```

4) Jalankan installer dan install file dependensi

```
yum install ld-linux.so.2
```

```
./installer.sh.x
```

5) Ikuti instruksi pada layar sampai instalasi selesai

```
Find your timezone from : http://php.net/manual/en/timezones.php e.g  
Europe/London  
Enter Your Time Zone: Asia/Jakarta
```

```
Enter the FQDN of the server (example: zpanel.yourdomain.com):  
Enter the Public (external) IP of the server:  
Password you will use for MySQL: myqlnyaapi  
Password you will use for MySQL: *****  
Re-enter the password you will use for MySQL: *****
```

```
ZPanel will now install, are you sure (y/n/q)?
```

6) Segera rubah password default :

```
user :zadmin
```

```
pass : password
```
